

PTMT^{PRO}
TAPS & BATH FITTINGS

Arlon[®]
Every Drop, Engineered.

मजबूत नल, बेहतर कल

FLOWING
with **PERFECTION**

ABOUT US:

Arlon Innovation Bharat Private Limited is a premier manufacturing entity specializing in advanced polymer sanitary solutions. Established in **2019** in the industrial heartland of Ahmedabad, Gujarat, the company has demonstrated an unprecedented growth trajectory.

In just **Five Years, Arlon Innovation** has transcended market competition to become the largest manufacturer of **PTMT (Polytetra Methylene Terephthalate)** Taps and Faucets in Gujarat. This regional dominance serves as the strategic launchpad for our ultimate objective: to stand as the undisputed market leader in India, setting new benchmarks for quality, scale, and sustainability in the non-metallic plumbing sector.

The Arlon logo is displayed in large, red, 3D block letters on the facade of a modern building. The letter 'A' is stylized with a yellow faucet handle integrated into its structure. The building has a light-colored, textured concrete or stone exterior and a series of dark-framed windows at the base.

Arlon

OUR JOURNEY: THE VELOCITY OF GROWTH

The rise of Arlon Innovation is a testament to manufacturing excellence.

2019:

Founded with a vision to replace corrosion-prone metal fixtures with superior engineering polymers.

The Sprint:

While legacy competitors relied on traditional methods, Arlon invested in high-speed, precision injection molding infrastructure.

The Milestone:

Achieving the status of **Gujarat's No. 1 PTMT Manufacturer** a feat achieved through relentless quality control and aggressive supply chain optimization.

INFRASTRUCTURE: THE ENGINE OF SCALE

Our manufacturing facility in Ahmedabad is designed not just for production, but for scalability. We operate a **24/7** production environment capable of meeting the massive volumetric demands of government projects, large distributors, and OEM partners.

01. | ROBUST PRODUCTION CORE

Advanced Injection Molding:

We utilize a fleet of high-tonnage, Servo-Driven Injection Molding Machines (IMM). These systems ensure energy efficiency and precise pressure control, resulting in flawless, high-density polymer bodies with zero structural voids.

Precision Tooling:

Our production utilizes multi-cavity, hot-runner molds manufactured from high grade hardened steel. This technology allows for rapid cycle times and ensures that the **1K Tap** produced is identical to the first.

02. | ASSEMBLY & PACKING AUTOMATION

To eliminate human error and bottlenecking, we have integrated significant automation into our post-production processes:

Semi-Automated Assembly Lines:

We employ standardized assembly jigs and torque-controlled pneumatic drivers for the fitting of spindles and cartridges. This ensures every tap has the perfect operating "feel" and is leak-proof.

Automated Bagging Systems:

Finished products are processed through high speed flow-wrap and auto bagging machines. This ensures hygienic, dust free packaging that is retail ready instantly.

Conveyorized Logistics:

From molding to boxing, material movement is streamlined via conveyor systems to minimize manual handling and damage.

Vision Inspection:

Integrated visual checks ensure that only products with perfect surface finish and correct component alignment reach the packaging stage.

Smart Infrastructure. Intelligent Automation.
Consistent Quality at Unmatched Scale.

PRODUCT PORTFOLIO:

ENGINEERING OVER MANUFACTURING

We do not just mold plastic; we engineer durability. Our products are designed to survive the harshest water conditions in India.

01. | PTMT TAPS & FAUCETS (THE FLAGSHIP)

Our core competency. Arlon's PTMT range is the result of advanced polymer science, offering:

- **Zero-Corrosion Guarantee:** Immune to hard water, salinity, and scaling.
- **Thermal Stability:** Engineered to withstand extreme temperature fluctuations without warping.
- **Aesthetic Brilliance:** Designs that mirror the elegance of premium metal fixtures at a fraction of the cost.

02. | SPECIALIZED PLUMBING ACCESSORIES

- **UPVC & CPVC Nail Clamps:** The backbone of modern piping. Our clamps are manufactured with high grade virgin polymers to ensure high load-bearing capacity and longevity for residential and commercial piping systems.
- **Plastic Sanitary Wares:** A comprehensive suite of durable, hygienic, and cost-effective bathroom solutions.

QUALITY POLICY:

"Engineering Perfection, Zero Compromise."

Arlon Innovation Bharat Private Limited is dedicated to redefining the standards of the sanitary ware industry by strictly adhering to a policy of "Engineering Over Manufacturing." We are committed to delivering **100% Defect-Free**, high-performance polymer solutions that withstand the rigors of Indian water conditions.

OUR QUALITY PLEDGE:

- **Material Integrity:** We pledge to use only high-grade, virgin engineering polymers that are BPA free and ecologically safe, ensuring absolutely no compromise on hygiene or structural strength.
- **Precision Manufacturing:** We maintain state-of-the-art injection molding infrastructure to ensure every unit meets precise dimensional tolerances and aesthetic standards.
- **Rigorous Testing:** Every batch undergoes stringent quality checks-including hydrostatic pressure testing and thermal stability analysis to guarantee a "Zero-Corrosion" lifecycle.
- **Continuous Improvement:** We are committed to the continual enhancement of our Quality Management Systems (QMS) to exceed customer expectations and regulatory standards.

STRATEGIC VISION & MISSION:

VISION:

"To Be India's Undisputed Leader in Non-Metallic Plumbing."

Our vision is to transform the Indian plumbing landscape by leading the paradigm shift from traditional metal to advanced engineering polymers. We aim to stand as **India's largest** and most trusted manufacturer of **PTMT Taps and Faucets**, recognized globally for setting new benchmarks in durability, sustainability, and scale.

MISSION:

"Innovate. Scale. Serve."

Our mission is to engineer value-driven solutions that improve the quality of life for millions. We achieve this by:

- **Innovating:** Continuously upgrading our polymer blends and mold designs to create products that are virtually unbreakable and aesthetically superior.
- **Scaling:** Building a robust, pan-India distribution network that ensures our **"Made in India"** products are accessible in every state, city, and village.
- **Serving:** Delivering true "Value Engineering" providing the market with premium, corrosion proof fixtures at honest, accessible prices, ensuring long-term value for our partners and consumers.

WHY CHOOSE ARLON INNOVATION BHARAT PVT. LTD.?

SCALE & CAPACITY

As Gujarat's Largest Manufacturer, we possess the production capacity to handle massive bulk orders with minimal lead time.

MATERIAL SCIENCE

We strictly use high grade, BPA-free engineering polymers that ensure hygiene and safety for potable water.

COST LEADERSHIP

Our economies of scale allow us to offer the most competitive rates in the market without compromising on structural integrity.

PRODUCT SPECIFICATION:

Easy to Install
& Maintain

Ideal For
Hard Water

Rust Free

Save Water

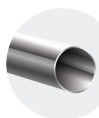

Long Life
Durability

Temp. Friendly

Zero Drop
Advantage

S.S. 304 Insert to
Give Extra **Strength**

36 Months
Warranty

It's high time that we start respect water and save every drop of it from wastage.
In fact there is an extreme shortage of potable water around the globe.

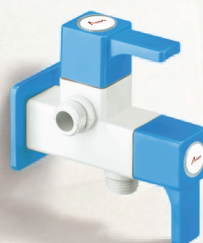

That's why **P.T.M.T. Faucets** have been uniquely designed with a Zero Drop feature that means that its dripless faucets do not let even a single drop of precious water from getting wasted, once they are closed.
